SUMMARY OF THE PROJECT:

Despite the important advances in the EU and the near-universal coverage of health insurance or national health systems, there are still major health inequalities across countries and regions, as well as across socio-economic groups. MEDICINET II is a project that promotes health care in a mountainous cross-border area, where there are some of the highest percentages of people at risk of poverty and social exclusion in Europe, having a traditionally diverse and multicultural society comprised of ethnically, religiously, and linguistically diverse groups.

More specifically, MEDICINET II supports the provision of High Quality Healthcare services by strengthening the capacity of 2 cross-border hospitals with

- New cutting-edge medical equipment related to surgeries' and emergencies' departments,
- Training to strengthen the exchange of know-how and the cooperation among the medical staff and a
- Healthcare Mobility Software serving people in remote and isolated areas

MediciNet II has been awarded the Gold Distinction in the Healthcare Business Awards 2019 in Greece and participated in the Interreg Slam Contest 2019 in Brussels among the eight best cross-border projects in Europe.
