FINANCER: European Regional Development Fund | National Funds

SUMMARY OF THE PROJECT:

The e-SOHECA project idea stems from the fact that the partners are located in remote locations and far away from large medical centers, thus the habitants of those areas face severe difficulties regarding the accessibility and quality of fundamental healthcare.

The issue amplifies especially when it comes to disabled citizens and habitants who reside in areas that are located away from the urban centers of the municipalities of Nestos, Topeiros and Zlatograd (such as villages and remote settlements), thus increasing the risk of those people to be left without proper healthcare in case of emergency.

This project establish a responsive e-social health care system which will include advanced medical equipments connected to a web based system, in order to provide ad-hoc healthcare to anyone in need.
